Thanks OK Jasmin – I know you CICs are stretched thin with the Gold King taking 3 of you away from normal activities.

Hi Paula,

When we talked today it was just to have a conversation with the home owner. Such as a phone call or quick visit (since I live in the area), but unfortunately I have do not have any free time to do editing for at least 3-4 weeks.

Thanks,

Jasmin

Importance: High

Jennifer & Jasmin – I've spoken to both of you today about one last property at VB/I-70 – OU1 that we somehow missed sampling all these years. I have spoken to the property owner who quickly handed the phone to Luis ?? who spoke English. I explained the situation and said that we would like access to sample the soil and then if necessary we would do a soil removal. He told me it would be best if we sent Mr. Morales Baca a letter in the mail which I agreed and said we would send it in both English & Spanish.

Fortunately, I have the original letters and access agreements that we drafted back in 2012 in both English & Spanish. I have made the appropriate changes in the English version – redlined and would ask for your assistance in making the same changes in the Spanish version of both documents.

FYI - I've also included both the English and Spanish versions of the fact sheet that is referenced in the letter. I don't think we need to change the fact sheets.

I think it would be good if one of you was the Spanish POC in case Mr. Morales Baca has questions. I don't care which of you but I would really like to get the sampling underway ASAP. I appreciate your assistance on this. Thank you.
